

Harsha Vardhan Reddy Inukollu

Full-Stack Engineer — React, Node.js, Express.js, Mongo DB

Email: harshainukollu3@gmail.com

Phone: +1 8167699560

Professional Summary

- **Full-Stack Developer (MERN, Python)** with expertise in **React.js, Node.js, Express.js, and Django**.
 - **Proficient in building scalable, secure, and high-performance applications** using modern web technologies.
 - **Expertise in developing and optimizing RESTful APIs and GraphQL services** for seamless data interaction.
 - **Strong front-end development skills** using **React.js, Redux Toolkit, JavaScript, TypeScript, HTML5, CSS3, and Tailwind CSS**.
 - **Backend development expertise** in **Node.js, Express.js, Python, Django, Django REST Framework**.
 - **Experience in database management**, including **MongoDB, MySQL, and PostgreSQL**, ensuring efficient data handling.
 - **Hands-on experience with UI development** using **HTML, CSS, JavaScript, jQuery, AJAX** for dynamic applications.
 - **Implemented real-time data visualization using Chart.js**, enhancing analytics and reporting.
 - **Experience with cloud computing and DevOps**, including **AWS (EC2, S3, Lambda), Docker, and Kubernetes**.
 - **Strong understanding of authentication and security best practices**, including **OAuth, JWT, and role-based access control (RBAC)**.
 - **Expert in performance optimization**, implementing **caching strategies, load balancing, and database indexing**.
 - **Proficiency in CI/CD pipelines and automation**, using **Jenkins, GitHub Actions, and Terraform** for deployment workflows.
 - **Strong background in Test-Driven Development (TDD)**, ensuring high-quality, maintainable, and bug-free applications.
 - **Expertise in performance tuning**, implementing **lazy loading, code splitting, and database query optimization** for faster application performance.
 - **Proficient in building scalable microservices architectures**, improving system efficiency and modularity.
 - **Solid foundation in Agile methodologies**, including sprint planning, daily stand-ups, and team collaboration.
 - **Strong testing and debugging experience**, working with **Jest, Postman and UAT Testing**.
 - **Committed to continuous learning, staying up to date with emerging technologies, and contributing to high-performing teams**.
-
- Experienced in **problem-solving, troubleshooting, and technical support**, ensuring smooth application performance.
 - Proficient in **code review processes, test-driven development (TDD), and best practices for maintainable codebases**.
 - Deep understanding of **website performance optimization**, including **load balancing, caching strategies, and real-time data handling**.
 - Skilled in **full-stack development**, integrating frontend and backend technologies for seamless user experiences.
 - Enthusiastic contributor to **open-source projects**, continuously learning and adopting the latest web technologies.

Technical Skills

- **Frontend Technologies:** React.js, Redux Toolkit, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, jQuery, AJAX
- **Backend Technologies:** Node.js, Express.js, Python, Django, Django REST Framework, GraphQL, RESTful APIs
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, API Gateway), Docker, Kubernetes, Terraform
- **CI/CD & Version Control:** Jenkins, GitHub Actions, Git, GitLab
- **Testing & Debugging:** Jest, Cypress, Postman, Unit Testing, UAT Testing
- **Security & Authentication:** OAuth, JWT, Role-Based Access Control (RBAC), Web Security Best Practices
- **Performance Optimization:** Caching Strategies, Load Balancing, Code Splitting, Lazy Loading, Database Query Optimization
- **Development Methodologies:** Agile, Scrum, Test-Driven Development (TDD), Microservices Architecture

Experience

Full Stack Developer

Aug 2024 – Present

Ally Bank

- Contributed to the development of **Ally Bank's Auto Financing Platform**, enabling customers to **apply for auto loans, manage payments, and check loan statuses** seamlessly.
- Built **React.js-based UI components** to enhance the customer experience for loan applications and account management.
- Developed **Node.js APIs using Express.js and MongoDB**, ensuring secure and efficient handling of loan transactions.
- Integrated **third-party credit score APIs** to facilitate real-time loan approval decisions.
- Worked with the team to implement **OAuth-based authentication** and secure customer logins.
- Deployed and managed **microservices on AWS using Docker and Kubernetes**, ensuring high availability.
- Assisted in optimizing **loan processing workflows**, reducing approval time by **30%**.
- Collaborated with cross-functional teams in an **Agile development environment** to enhance loan management features.
- Improved the **loan approval process**, making it faster and more user-friendly.
- Enhanced **security and compliance measures** by implementing **role-based access control (RBAC) and encryption**.
- Helped scale the system to **support thousands of loan applications daily**, improving system reliability.

Senior Software Engineer

Jun 2022 – May 2023

Infinite Computer Solutions (Verizon - OneOps Project)

- Developed an **internal portal for raising and managing database permission requests**.
- Built and optimized **React.js UI components** for seamless request submission and tracking.
- Implemented **approval workflow screens** for processing database permission requests.
- Created and maintained **Node.js and Express.js APIs** to handle request approvals.
- Utilized **Redux Toolkit** for efficient state management and improved user experience.
- Styled components using **Tailwind CSS** to ensure responsiveness and consistency.
- Conducted **Unit Testing (Jest) and UAT Testing** to enhance reliability and stability.
- Worked in an **Agile development environment**, collaborating closely with backend and DevOps teams.
- Integrated **logging and monitoring tools** for tracking API performance and debugging.
- Assisted in **optimizing API performance and query efficiency** for large-scale request processing.

Senior Software Engineer

Jul 2020 – Jun 2022

ADP

- Contributed to the development of **ADP's HR & Employee Benefits Portal**, enabling employees to manage **health benefits, retirement plans, and leave requests** efficiently.
- Worked alongside **frontend, backend, and DevOps teams** to ensure a **user-friendly and secure application**.

- Developed and optimized **React.js components** for an interactive HR management experience.
- Implemented **GraphQL APIs in Node.js and Django REST Framework (DRF)** for real-time benefits data retrieval.
- Integrated **MongoDB and PostgreSQL** for efficient and secure employee data management.
- Developed role-based authentication using **OAuth and JWT**, ensuring secure employee access.
- Assisted in improving **API response times by 30%**, enhancing portal performance.
- Participated in **CI/CD pipeline automation (Jenkins, GitHub Actions)** for seamless application deployment.
- Supported testing efforts by working on **unit and integration tests using Jest and Cypress**.
- Enabled **real-time benefits tracking**, improving employee experience and reducing HR workload.
- Automated **leave request and approval processes**, reducing manual intervention by 40%.
- Contributed to a **secure and scalable HR portal**, handling data for **100K+ employees**.

Software Engineer
FedEx

Jun 2017 – Jul 2020

Self-Service Customer Support & Claims Portal

- Developed a **self-service customer claims portal** using **HTML, CSS, JavaScript, jQuery, and AJAX**.
- Designed and built **dynamic UI components** to allow users to **file claims, track refunds, and request support** seamlessly.
- Implemented **real-time form validation** to ensure accurate and complete claim submissions.
- Created **interactive dashboards** for customers to monitor their claim statuses.
- Developed **responsive and accessible web pages**, ensuring cross-browser compatibility.
- Integrated **AJAX-based data retrieval**, reducing page reloads and improving UX.
- Designed **search and filtering features** to help users quickly locate claim history.
- Integrated **custom alerts and notifications** to inform users about claim updates.
- Developed a **drag-and-drop file upload system** for submitting required claim documents.
- Assisted in optimizing **front-end performance**, reducing load times by 40%.
- Worked closely with **UI/UX designers** to create an intuitive and user-friendly interface.
- Conducted **user acceptance testing (UAT)** to identify and resolve UI inconsistencies.
- Maintained and updated the **frontend codebase**, ensuring continuous improvements.

Supply Management System - Migration from Angular to React

- Assisted in **migrating the front-end of a Supply Management System from Angular to React.js**, improving maintainability and performance.
- Developed **React.js UI components** to create an intuitive dashboard for tracking supplier performance and purchase orders.
- Built and maintained **Django REST Framework** to facilitate backend data management and workflow automation.
- Developed **interactive data visualization charts** using **Chart.js** for real-time tracking of supplier delays and performance.
- Implemented **drag-and-drop PO management** using **React DnD**, enabling seamless order tracking.
- Designed and developed **dynamic procurement reports**, providing insights into order fulfilment and supplier efficiency.
- Integrated functionality to **track supplier delays and trigger alternative sourcing** when necessary.
- Automated notifications to **update payment terms, and estimated time of arrival (ETA)** dynamically.
- Developed a **search and filter system** to help users quickly access critical supplier and inventory details.
- Implemented **role-based authentication (RBAC)** to secure access to procurement data.
- Automated **CI/CD pipelines with Jenkins and GitHub Actions** to streamline deployments.
- Utilized **lazy loading and code splitting** to enhance application load time and responsiveness.
- Worked with cross-functional teams to ensure **accurate synchronization of procurement data between the UI and backend**.

Education

University of Central Missouri **Lee's Summit, MO, USA**

Master Of Science (Computer Science)
