PROFESSIONAL EXPERIENCE

Full Stack Developer, SYNEOS Health, (NC), USA

September 2022 – Current

- Designed and developed a **Java** backend service using **Spring Boot** framework for real time analytics of patient's data.
- Created a **ReactJS**-based electronic health record (EHR) system, optimizing the retrieval and update of over 60K patient files in less than 200ms, thereby increasing healthcare providers' productivity by 70%.
- Developed and implemented a comprehensive authentication system using **Node.js** for a RESTful API, resulting in a 20% decrease in unauthorized access attempts in cloud services.
- Implemented Apache **Kafka** processor within healthcare systems, adopting an event-driven architecture (EDA) to slash patient record processing time by 40% and ensure scalable, real-time event management.
- Implemented an efficient web application deployment strategy on **AWS**, utilizing **EC2** instances for compute, **S3** buckets for storage, and CloudWatch for logging and monitoring. This resulted in an impressive response time of 0.5 seconds.

Software Development Engineer, People Tech Group, General Motors, USA

March 2020 – July 2022

- Developed a Java11-based **microservice** using **Spring** boot framework for insurance file sharing, connecting to **Azure** SDK storage, resulting in efficient file handling and transfer.
- Implemented a custom file pooling mechanism with Spring Scheduler, reducing error files and ensuring automated file management in a high-availability **production** environment.
- Designed and implemented Java-based network applications utilizing deep understanding of **TCP/IP** and **HTTP** protocols, optimizing communication and data exchange.
- Enhanced data processing speed by developing a Java worker component for efficient queue listening and log file transformation within **Unix/Linux** systems, reducing processing time significantly.
- Applied Spring Security, **OAuth 2.0**, and **LDAP** for robust authentication and authorization frameworks. Achieved a 95% pass rate in backend system unit tests, contributing to high-quality assurance practices.
- Implemented CI/CD pipelines using GitHub Actions workflow for building, deploying and testing components to an Kubernetes Cluster using Helm.

INTERNSHIPS & PROJECT EXPERIENCE

Junior Software Developer, Activenet IT Services Pvt Limited

October 2018 – January 2020

- Enhanced MVR application functionality and efficiency in job viewing and file inspection by integrating **RESTful** services, utilizing **JPA** and **Spring Data** for robust data management.
- Designed React and Material UI-based dashboard, contributing to a 20% boost in user engagement.
- Executed integration test scripts using Postman, focusing on API functionality and end-to-end system integration.
- Developed optimized **queries** for **RDBMS** and implemented data persistence across **MongoDB**, and Redis databases.

E-commerce platform, Web Developer

January 2018 – July 2018

- Enhanced AngularJS-based shopping cart system, leading to a 15% increase in **client engagement** appointments.
- Operated **ExpressJS** for efficient backend routing, reducing average response time to 100ms.
- Produced efficient **database** modeling, accelerating data retrieval speed by 25% and reducing query execution time.

Chatbot Application

March 2017 – November 2017

- Developed and implemented a **serverless** real-time chat application for university support, leveraging **AWS** AppSync and **GraphQL** to enable instant messaging among students, resulting in a 50% increase in communication efficiency.
- Crafted an isomorphic customer engagement application in vanilla **JavaScript**, ensuring compatibility across both web browsers and **Node.js** environments, to enable seamless real-time updates and notifications for students.

TECHNICAL SKILLS

- Web Development:** HTML, CSS, JavaScript, ReactJS, JSON, Typescript, MVC, Mobile
- Programming Languages:** Java, Kotlin, Python, Bash
- Frameworks:** Spring Boot, Spring, Hibernate, NodeJS, Kafka, Swagger
- Database Management:** MySQL, No SQL, GraphQL, MongoDB, Firebase
- Source Control & Collaboration Tools:** Docker, Android Studio, Kubernetes, Git, GitHub
- Build Tools:** Maven, Gradle, Jenkins
- Technical Expertise & Core Competencies:** Object Oriented Programming, Data Structures, System Design
- Cloud Technologies:** Azure, Amazon AWS
- Software Methodologies:** Agile, Scrum, SDLC

EDUCATION

- | | | |
|---|---------------------------------|-------------|
| • Master of Science in Information technology | Central Michigan University, MI | GPA: 3.77/4 |
| • Bachelor of Technology in Computer Science | JNTUH, Hyderabad | GPA: 7.8/10 |

CERTIFICATIONS & ACHIEVEMENTS

- Attained SAFe 5 Practitioner Certification.
- Excelled in analytical and design skills, optimizing workflows and system functionality
