SUMMARY

Java Full Stack Developer with 5 years of experience building scalable, high-performance applications in healthcare. Skilled in Java, Spring Boot, React, REST APIs, Kafka, Redis, Microservices, SQL/NoSQL, and CI/CD. Experienced in solving complex engineering challenges, delivering production-ready solutions, and collaborating with cross-functional teams to optimize workflows and improve user experience.

SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript ES6, Redux, HTML5/CSS3, Responsive UI, Tailwind
- **Backend :** Java 8+, Spring Boot, RESTful APIs, Microservices
- **Database:** SQL, Redis
- **Messaging & Integration:** Kafka, JMS
- **CI/CD & Tools:** Docker, AWS ECS, Git, Jenkins, GitLab CI, Maven, Gradle, Sentry, Grafana, Jira
- **Testing:** JUnit, Jest, Cypress, Jasmine
- **Practices:** System Design, API Architecture, Microservices, Performance Optimization, CI/CD, Agile, Code Reviews, Documentation

PROFESSIONAL EXPERIENCE

Full Stack Developer, CVS Health, USA

September 2023 – Present

- Developed scalable Next.js, **React**, TypeScript applications using Redux and React hooks for reusable, maintainable components. Optimized frontend workflows and performance, reducing load times by 40% and improving overall user experience.
- Built and re-architected **Java 21, Spring Boot** microservices integrated with Eureka, Config Server, and API Gateway. Implemented **Redis** caching and Kafka event-driven pipelines, improving throughput and reducing processing delays by 50%.
- Implemented scalable microservices using **Apache Kafka** for event-driven messaging, Hibernate/JPA for database persistence, and Spring transactional management to ensure data consistency, reliability, and high performance across distributed systems.
- Developed scheduling agents with **Amazon Bedrock OpenAPI**, NLP pipelines, and Python automation scripts, improving case preparation and claims-processing efficiency by 60%. Implemented **RestApi** subscriptions and **WebSockets** for real-time updates.
- Led **Agile**, Scrum teams using GitLab, and Slack, managing the full development lifecycle. Improved sprint predictability, code coverage to 85%, and reduced operational bottlenecks.
- Used Unix/Linux scripts to deploy applications and automate deployment workflows, integrating Maven for build automation with **Docker** and **Kubernetes** based deployments.
- Built secure **AWS** infrastructure with ECS, API Gateway, S3, and Redis. Established CI/CD pipelines with automated testing (Jest, JUnit) and monitoring (Prometheus, Grafana), reducing production incidents by 25%.

Associate Software Engineer, Ahex Technologies Private Limited, USA

January 2020 – May 2023

- Developed dynamic and responsive web applications using **React**, incorporating UX design principles alongside TypeScript, Redux, and Material UI to deliver intuitive state management, reactive workflows, and modern user interfaces.
- Developed a **Java-11** based microservice using Spring boot framework for insurance file sharing, connecting to Aws S3 storage, resulting in efficient file handling and transfer.
- Implemented a custom file pooling mechanism with **Spring Scheduler**, reducing error files and ensuring automated file management in a high-availability production environment.
- Designed and implemented Java-based network applications utilizing deep understanding of **TCP/IP** and HTTP protocols, optimizing communication and data exchange.
- Enhanced data processing speed by developing a Java worker component for efficient **queue** listening and log file transformation within Unix/Linux systems, reducing processing time significantly.
- Applied **Spring Security**, OAuth 2.0, and LDAP for robust authentication and authorization frameworks. Achieved a 95% pass rate in backend system unit tests, contributing to high-quality assurance practices.
- Implemented **CI/CD** pipelines using GitHub Actions workflow for building, deploying and testing components to an Kubernetes Cluster using **Helm**.

EDUCATION

- Master of Science in Computer Science University of Central Missouri, USA
- Bachelor of Technology in Computer Science and Engineering JNTU Hyderabad

PROJECTS

All Ways Caring - HomeCare

- Built and maintained a **scalable React.js** healthcare application, leveraging **Swagger/OpenAPI** documentation and Postman to validate and test end-to-end workflows, improving operational efficiency and care delivery.
- Developed **Java Spring Boot RESTful services** integrated with a **SQL database**, and implemented **JUnit**-based unit and integration tests to ensure API reliability, data integrity, and long-term maintainability.

CERTIFICATIONS & ACHIEVEMENTS

- Certified in System Design LLD and HLD, demonstrating expertise in architecting scalable, efficient systems with a strong focus on design principles, performance optimization, and real-world application.
- Awarded "**Excellence in Development**" for enhancing application performance by 30% and leading innovative solutions that improved system performance by 30%.
