

SUMMARY

Software Engineer with 5 years of experience building scalable, high-performance applications in finance. Skilled in Java, Python, React, REST APIs, Kafka, Redis, Microservices, SQL/NoSQL, and CI/CD. Experienced in solving complex engineering challenges, delivering production-ready solutions, and collaborating with cross-functional teams to optimize workflows and improve user experience.

SKILLS

- Frontend:** Angular (v8+), React, Next.js, TypeScript, JavaScript ES6, RxJS, Redux/NGRX, HTML5/CSS3, Responsive UI, Tailwind
- Backend :** Java 8+, Spring Boot, RESTful APIs, Microservices, Node.js, Python
- Infrastructure:** PostgreSQL, Redis, Docker, AWS ECS/Lambda/RDS/S3
- Messaging & Integration:** Kafka
- CI/CD & Tools:** Git, Jenkins, GitLab CI, Maven, Gradle, Sentry, Grafana, Figma, Jira
- Testing:** JUnit, Jest, Cypress, Jasmine
- Practices:** System Design, API Architecture, Microservices, Performance Optimization, CI/CD, Agile, Code Reviews, Documentation

PROFESSIONAL EXPERIENCE

Software Engineer II, CVS Health, USA

September 2023 – Present

- Developed scalable Next.js, React, TypeScript applications using Zustand and React hooks for reusable, maintainable components. Optimized frontend workflows and performance, reducing load times by 40% and improving overall user experience.
- Developed a high-performance 3D visualization tool using Three.js to convert 2D MRI scans into interactive 3D models, enabling clinicians to perform more precise diagnostic assessments and surgical planning.
- Built and re-architected Java 21, Spring Boot microservices integrated with Eureka, Config Server, and API Gateway. Implemented Redis caching and Kafka event-driven pipelines, improving throughput and reducing processing delays by 50%.
- Designed secure, high-availability REST APIs with OAuth2/JWT (Spring Security), applying OWASP Top 10 controls and RBAC to prevent common vulnerabilities, and integrated Amazon RDS for scalable, reliable data persistence.
- Developed scheduling agents with Amazon Bedrock OpenAPI, NLP pipelines, and Python automation scripts, improving case preparation and claims-processing efficiency by 60%. Implemented GraphQL subscriptions and WebSockets for real-time updates.
- Led Agile, Scrum teams using GitLab, Slack, and New Relic, managing the full development lifecycle. Improved sprint predictability, code coverage to 85%, and reduced operational bottlenecks.
- Used Unix/Linux shell scripts to deploy applications and automate deployment workflows, integrating Maven for build automation with Docker and Kubernetes based deployments.
- Built secure AWS infrastructure using Terraform (IaC) with Lambda, ECS, API Gateway, S3, and Redis. Established CI/CD pipelines with automated testing (Jest, JUnit) and monitoring (Prometheus, Grafana), reducing production incidents by 25%.

Software Engineer, Ahex Technologies Private Limited, USA

January 2020 – May 2023

- Developed dynamic and responsive web applications using Angular 14, incorporating UX design principles alongside TypeScript, RxJS, NgRx, and Angular Material to deliver intuitive state management, reactive workflows, and modern user interfaces.
- Developed a Java-11 based microservice using Spring boot framework for insurance file sharing, connecting to Azure SDK storage, resulting in efficient file handling and transfer.
- Implemented a custom file pooling mechanism with Spring Scheduler, reducing error files and ensuring automated file management in a high-availability production environment.
- Designed and implemented Java-based network applications utilizing deep understanding of TCP/IP and HTTP protocols, optimizing communication and data exchange.
- Enhanced data processing speed by developing a Java worker component for efficient queue listening and log file transformation within Unix/Linux systems, reducing processing time significantly.
- Applied Spring Security, OAuth 2.0, and LDAP for robust authentication and authorization frameworks. Achieved a 95% pass rate in backend system unit tests, contributing to high-quality assurance practices.
- Implemented CI/CD pipelines using GitHub Actions workflow for building, deploying and testing components to an Kubernetes Cluster using Helm.

EDUCATION

Master of Science in Computer Science	University of Central Missouri, USA
Bachelor of Technology in Computer Science and Engineering	Jawaharlal Nehru Technological University Hyderabad

PROJECTS

Predicting Early Readmission in Diabetes Patients

- Processed 100K+ patient records from 130 hospitals, engineered 30+ features from raw clinical data and built predictive models (XGBoost, LightGBM, Random Forest) achieving 76% accuracy on readmission classification.
- Identified key risk factors influencing readmission rates and delivered data-driven strategies projected to reduce hospital costs by 25%, improving care efficiency and resource utilization.

Multimodal YouTube Content Intelligence Platform

- Built a multimodal AI pipeline combining computer vision (CNNs, Vision Transformers) and audio processing (Whisper, MFCCs) to analyze YouTube videos, extracting visual scenes, speech transcripts, sentiment, and engagement cues to generate enriched metadata and content summaries.
- Implemented a RAG-based recommendation and tagging system using embeddings from video frames and audio transcripts, improving content categorization accuracy by 40% and reducing manual labeling effort by 65%, with inference served via FastAPI and containerized deployment.

Food Image Classification & Restaurant Feature Prediction

- Built a ResNet-based food image classifier using transfer learning on the Food-101 dataset, achieving 88% accuracy across 101 categories and enabling computerized meal recognition for personalization and nutrition tracking.
- Enhanced Gradient Boosting, Random Forest and Decision Tree models on the Zomato dataset to predict restaurant features (ratings, cuisine, cost), improving analytical accuracy and supporting restaurant optimization insights by 35%.

CERTIFICATIONS

- Certified in System Design LLD and HLD, demonstrating expertise in architecting scalable, efficient systems with a strong focus on design principles, performance optimization, and real-world application.
- Achieved AWS Certified Developer Associate which strengthened cloud deployment expertise and improved development to production delivery cycles.
